

JASMANJOT SINGH SARNA

AI/ML ENGINEER | FULL STACK DEVELOPER | DATA ANALYST/SCIENTIST

Jaipur, Rajasthan, India | +91 9079636451 | jasmanjotsinghsarna@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

SUMMARY

Final-year B.Tech Computer Science (AI & ML) student with versatile, cross-functional experience spanning AI/ML engineering, full-stack development, and data analytics. Worked as an AI Full Stack Developer at Lavelda Coffee Beans building LLM-powered chatbots end to end, and as a Data Analyst Intern at AppGallop delivering KPI dashboards and analytics pipelines. Built a 10-module full-stack SaaS platform (CareerOS) using React, Next.js, NestJS, and PostgreSQL with integrated OpenAI API features; a multi-agent research pipeline using LangChain and GPT-4o-mini; CNN-based deep learning models for computer vision; and a regression model predicting student health scores from lifestyle data. Comfortable operating across the full pipeline: data cleaning & EDA, statistical modeling, LLM/agent workflows, and production-grade software engineering.

EDUCATION

B.Tech – Computer Science Engineering (AI & ML)

2023 – 2027

JECRC University, Jaipur

CORE SKILLS

Generative AI & LLMs: OpenAI API, LangChain, RAG, Multi-Agent Systems, Prompt Engineering

ML & Deep Learning: PyTorch, TensorFlow, Scikit-Learn, CNNs, BiGRU, Regression, Model Evaluation

Full Stack Development: React, Next.js 15, TypeScript, NestJS, Node.js, REST APIs, PostgreSQL, Redis

Data & Analytics: Python, Pandas, NumPy, SQL, Power BI, EDA, Statistical Analysis

Tools & Practices: Git, npm/Turborepo, Google Colab, Continuous Learning Mindset

INTERNSHIP EXPERIENCE

AI Full Stack Developer – Lavelda Coffee Beans

Jan 2026 – July 2026 | Remote

- Developed and deployed LLM-powered AI chatbots using the OpenAI API to automate customer support and product inquiries.
- Designed prompt engineering workflows to optimize chatbot accuracy and improve response quality.

Data Analyst Intern – AppGallop Pvt. Ltd.

Feb 2025 – Jan 2026 | Remote

- Performed data preprocessing and EDA in Python/Pandas to support accurate, reliable reporting.
- Built and automated KPI dashboards in Power BI, translating raw data into structured insights.

Summer Intern – Samatrix Consulting Pvt. Ltd.

June 2025 – July 2025 | Remote

- Cleaned and transformed real-world datasets using statistical techniques, preparing structured data for downstream analysis.

TECHNICAL PROJECTS

CareerOS – AI Career Operating System (10-Module SaaS Platform)

May 2026 – Present

React, Next.js 15, NestJS, PostgreSQL, Redis, BullMQ, OpenAI API

- Built both the frontend (React/Next.js 15) and backend (NestJS) for a 10-module SaaS platform, including the AI Resume Suite, Interview Suite, and Job Tracker modules.
- Integrated the OpenAI API with prompt engineering to power an AI ATS Resume Builder module.

Multi AI Agent Research System

2026

Python, LangChain, GPT-4o-mini

- Built a multi-agent research pipeline using LangChain and GPT-4o-mini, with search and reader agents collecting data and writer and critic agents producing the final report.

Health Score Predictor

2026

Python, Scikit-Learn, Pandas, Regression

- Built a regression model to predict a student health score from demographic, academic, lifestyle, social media usage, sleep, and stress-related features.

Face Emotion Recognition System

Dec 2025 – Jan 2026

Python, OpenCV, TensorFlow, PyTorch

- Built and evaluated two CNN-based deep learning models — one in TensorFlow, one in PyTorch — for real-time facial emotion classification via webcam input.

CERTIFICATIONS

- Meta Full Stack Developer Professional Certificate — Coursera Online
- IBM AI Engineering Certificate — Coursera Online
- IBM Data Scientist Professional Certificate — Coursera Online
- Google Data Analytics Certificate — Coursera Online
